maxim.bleeker@gmail.com

I'm a software engineer with a passion for building products that make a difference. I'm currently working on a project that helps manage chemical levels in their pools. I'm interested in working on a team that is passionate about what they do and is willing to take calculated risks to make a difference.

EXPERIENCE

Pooldash, Location — *Freelancer*

August 2022- Present

- Developed a new import feature that allows users to load data from outside the app.

-Reviewed design specs and translated them into features on mobile.

Boom Nation, Austin —Junior Software Engineer

March 2022 - July 2022

- Participated in the planning process to find ways that connect employers with workers, such as leveraging the google search indexing api to crawl the Boomnation job board and post those jobs on google jobs.

- Debugged and solved issues from implementation of 3rd party libraries across mobile operating systems and contributed to new features.

Goodlooking Company, Austin — *Junior Software Engineer*

September 2021 - March 2022

- Involved in the design and development of new features.

-Refactored legacy styling to improve the look and quality of the software.

BCDF, Austin — *Company Member and Ballet Instructor*

August 2017 - June 2021

- Trained and prepared professional full-length performances at the The Long Center for the Performing Arts.

-Instructed adult ballet classes open to the community.
